diers. The score was 22-4, and the exhibition was not sensational.

Adolph Jensen, a native of Norway, yesterday declared his intention of becoming a citizen.

Don't forget to attend the sale of useful articles at the Presbyterian church this afternoon and evening. Everyone is invited to be present.

The baseball game between the Fort Stevens and Eagles teams at A. F. C. park Sunday afternoon resulted in a victory for the sol-

The nominations made by the socialists of the county at their re-

cent convention were filed yesterday, with the exception of the nomination for sheriff.

At the meeting of the C. B. F. P. U. Saturday night the proposal for affiliation with the Fishermen's Union of the Pacific Coast and Alaska was voted down.

A force of men yesterday commenced the work of installing cement sidewalks on Exchange street. The force will next put in the cement walks on Sixteenth street.

Coroner Pohl stated last evening that nothing further had been reported to him of the alleged finding of a body near White's island, and expressed the belief that the story was incorrect.

Miss Lille Cash died Sunday evening from the effects of poison taken with suicidal intent. The woman lived on Astor street, and swallowed a quantity of bichloride of mercury. The dose was taken several days ago, but the victim lingered until Sunday. Coroner Pohl is to hold an inquest today.

The ladies of the First Presbyterian church will hold a sale of useful articles at the dining room of the church commencing at 3 this afternoon and continuing until the evening. Refreshments will be served. Many fine articles will be offered for sale, and the ladies extend an invitation to the public to attend. The proceeds will be devoted to the church.

Simon P. Wilson left yesterday for his home in Wisconsin, to reside there permanently. Mr. Wilson was C. H. Abercrombie's law partner and during his residence in Astoria made many warm friends, all of whom regret that he has seen fit to return to the east. Mr. Wilson was the democratic nominee for justice of the peace of Astoria precinct, and the county committee has filled the vacancy by naming A. R. Cyrus.

The Odd Fellows' entertainment committee is still complaining that accommodations can not be found for all of the visitors who will attend the grand lodge sessions here, and asks that public spirited Astorians throw open their homes to the guests of the city. The committee is anxious to secure the addresses of all persons who can accommodate visitors, and expresses the hope that the residents of the city will assist the Odd Fellows in caring for the delegates.

Some 15 offenders graced the dock in the police court yesterday afternoon, nearly all being charged with the offense of drunkenness. One young man, who had been released on \$10 bail, demanded a jury trial, and told the court he would like to have two days in which to prepare his case. The court granted the two days, but increased his bail to \$50. He was unable to raise the sum and went to jail. He was inclined to be a trifle enthusiastic in his own defense, and stared in blank astonishment when the court raised his bail.

Recently the Chamber of Commerce committee on transportation was instructed to request the O. R. and N. Co. to make better freight and passenger rates from Astoria to San Francisco. At the present time the rates from Portland are

There are twenty different cinnamon barks, and they cost from 4 to 55c lb. This explains the market, all but one particular. Schilling's Best is the best with the coarser pieces picked-out; not thrown-away; oh no; they go to some less particular grinder.

Moneyback everything.

the same as the rates from Astoria, notwithstanding the difference in distance of 100 miles. G. W. Lounsbury, chairman of the committee, wrote to the head office of the company, but has not yet received a reply, as the officials are touring the coast with some high officials who are out from the east. The chamber will make an effort to secure lower rates on all lines.

Benjamin Boutell, a capitalist of Bay City, Mich., who had been visiting in the city for a few days, left yesterday for a trip to other parts of the northwest. Mr. Boutell is engaged in the towing business on the Great Lakes and his company annually brings 200,000, 000 to 300,000,000 feet of logs to Bay City. He is interested in a Portland cement company at Oakland and is on the coast to look after his affairs there. Mr. Boutell believes Astoria has a great future and says all of the lumber will be manufactured here eventually.

George H. Himes has sent to the Chamber of Commerce a map showing the arrangement of Fort Astoria. The map was photographed from the exhibit at Washington but it does not correspond at all with accurate descriptions of the old post. According to this map the post was much greater in length than in width, with the extreme corners at north and south, where were located bastions, the south one containing four guns. A water battery is also shown on this map in front of the entrance on the river side of the picture, and to the northeast of the post. Only a very small portion of the river is shown, so no idea can be obtained as to the exact location of the fort. Judge Bowlby had written to Washington for a copy of the map, and was much disappointed upon seeing the copy sent down by Mr. Himes. After securing all the data obtainable, the Chamber of Commerce will take steps to positively determine the position occupied by the fort and properly mark it.

F. L. Parker, one of the members of the seawall committee, stated yesterday that the committee was waiting for the reply of A. B. Hammond, president of the A. & C. When the proposal was first taken up Mr. Hammond expressed to the committee his favorable view of the undertaking, but the committee's circular asking for an expression for the railroad company has not yet brought a reply. Mr. Hammond wrote the committee some time ago, saying he would confer with the members regarding the proposal, but thus far has found it impossible to visit the city. Mr. Parker says the committee will call a mass meeting when the reply of the A. & C. is received, at which time the attitude of the property owners interested will be made known. The reply of the railroad company is an important consideration, as it will influence the attitude of many of the smaller property owners. The A. & C. and the Clatsop Mill Company are the only large concerns which have failed to send in their replies.

**PERSONAL MENTION.**

Sofus Jensen was in the city yesterday from Altoona.

Frank D. Shields of Portland spent Sunday in the city.

Frank Shields, of the Standard Oil Company left for Portland last evening.

Henry Nice, superintendent of the Elmore cannery at Alsea, was in the city yesterday.

Miss Edith Ohler returned from California where she has been visiting since November last.

Ralph Worsley arrived yesterday on the Oregon from San Francisco and went to Svensen last evening for a ten days' visit with his parents.

**FACTS ABOUT THE  
MONARCH RANGE**

The seams and joints made tight with malleable frames prevent the admission of air from the outside into the flues except through the firebox.

The oven bakes properly with the same fire that is used in doing other work.

The arrangements for water heating in all forms is such that there is no interference with the operation of the range for other purposes.

The use of malleable iron makes the Monarch a range that will not crack, warp, break or open in the seams. Consequently there is no increase during the life of the range in the amount of fuel required. The amount of fuel necessary the first year determines the amount it will use any other year. It is clear then that there is a saving in the item of repairs in using a Monarch, since the greater the amount of fuel used in a range the sooner and oftener will it need repairs.

Try where you will you cannot find a range that will give better satisfaction for the money. We are sole agents for Astoria.
